Official Notice Of Price Increase Effective February 1, 2023

At 150 Water Supply, we work hard every day to bring affordable water to you our members, but as you know due to the rising inflation, costs have skyrocketed making it increasingly difficult to run our system on our current rates. So, it is with much consideration that we have changed our way of calculating the rates for the water company. We will be adopting a 6 Tier Water Rate Table. What does that mean? It will mean the more water used the higher the rate for said water. Below is the 6 Tier Table we will be implementing as of **February 1, 2023**, as well as examples of water usages. If you have any questions, feel free to contact the office at **936-767-8212** during normal business hours.

Thank you for your cooperation during this transition.

Monthly Minimum:	\$35.61 + tax
Tier (gal.): 5/8" meter	\$/1,000 gal.:
2,001-6,000	\$3.90 per thousand
